## The GENIUS INSIGHT APP\*

This App is an interactive Voice Biofeedback Tool that can not only Analyze your Health Conditions but can bring your Body Back into Balance by Generating Healing Audio Sound Tones that are Unique and Specific to your Needs. The Genius Insight App is an Expansive Program. It is a Combination of several Healing Modalities including: \*Acupuncture, \*Nutrition, \*Homeopathy, \*Herbs and \*Everything in Between.

The Genius Insight App IS THE MOST Expansive Holistic Healing APP on the Market at This Time.

## Understanding the Genius

Genius Insight APP is designed on a concept of measuring frequencies and then determining the responses based upon certain deviations from a standard normal range. It's done by employing patented voice analysis software. It compares the voice imprint against the Genius Software Database containing thousands and thousands of energetic frequencies and signatures ranging from herbs, emotions, homeopathic's virus activity, auric field disturbances, chakra & acupuncture imbalances to name a few.

The voice is also broken down using Fast Fourier Transform (FFT) algorithm and then testing is essentially comparing the frequency of said item against the single frequency of the voice tone. It then looks for discrepancies in terms of the pitches, thoughts, etc. of the comparison between the two items. These are then translated into a numerical value. The highest and lowest numbers indicate the highest probably of disturbance.

The Balancing process plays a respective tone for the said item for the duration specified. Each item contains the energetic signature or imprint of that specific item, so the program is working on balancing a specific item with a respective frequency.

The picture scan and identifying characteristics and birth details are extra components to help strengthen the energetic link.

It Really Is Quite Genius, Right?

## ENTANGLED INSIGHTS

**Note:** Each category also has a feature of an Entangled Insights Analysis. When using the Entangled Insights Panel you load the entire list by pressing the Show All: Tap Here words then Tap ALL and Press Check. What happens is that the entire Entangled List is loaded and scanned against the chosen item, you manually selected. When it gives a % reading, if the % reading is high, it indicates that these items shown have a high probability and should be evaluated and analyzed against your results. In other words, drag these high items to the Quick Zap or Main Hold Tray and provide energetic balancing according to your desires.

# SYNERGISTICS

Synergistics Tutorial: <https://www.youtube.com/watch?v=0e9TyrCFI14>

**Function:** This allows you to check various herbs, supplements etc. against yourself or a client by either placing the item on the Labyrinth test Plate or entering the word and conducting an archetype encoding process. *The more complete the circle is, the more beneficial this item may be for the client.*

In the instance of the "Synergistics Panel" it is important to understand, the results are not showing you whether this is a good product or a bad product for you. What it is ONLY showing you, is where this product will have the most impact/influence. If they are all full circles, it is showing you that this product will impact all the specific energetic fields. It is NOT showing you, whether this is a good or bad product for the person. In my opinion, the Quantum Technology is not really capable of such processes. This is where you or a health practitioner needs to apply their clinical expertise and clinical context of the client (as well as the supplement being tested)

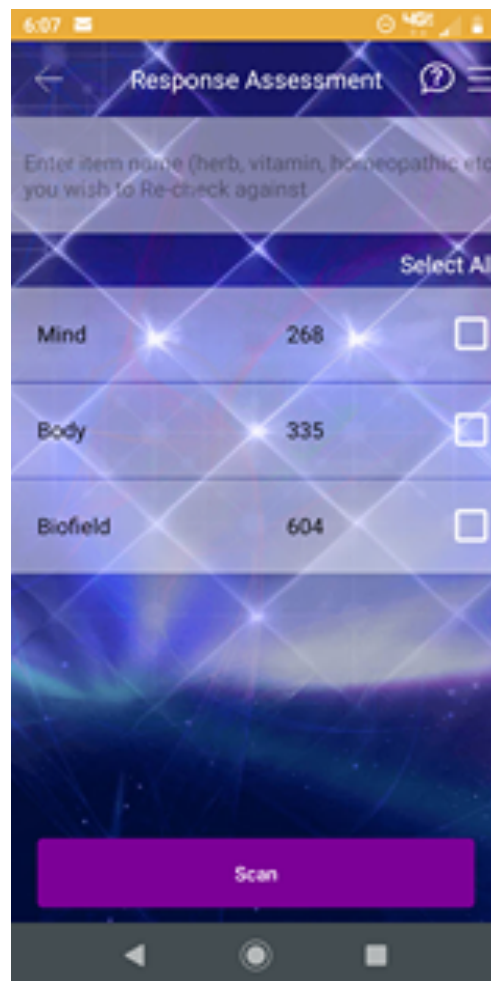

So again, in this instance, what this is telling us is that this product will impact all the energy fields. However now as a practitioner, this is where we apply our clinical context and knowledge:

- 1: Is the client currently taking this item?
- 2: If so, why is this coming up? Lack of absorption or toxicity of this substance?
- 3: Is this a toxic substance? If so, then this is how such a toxic substance would impact the client.
- 4: What are their symptoms?

## Response Assessment

## APP Navigation Features:

Genius Insta Chat  This is our built in service you can reach out to the company and fellow users.

Use the arrow Icon  to move between Panels, it's also used to cancel the session and move between clients, a message will appear to confirm.

Use the Lines icon  to reach the Navational Panels for additional navigation features.

You can open and close the Quick Zap tray by pressing the box “”

You can open and close Main Hold tray by pressing the box “”

Set the Timer by sliding the orange ball  0 min 30 min and tap  to Play

If you see **Select All** if will check all boxes

## The RESULT COLORS

**Green** indicates balance **Red**, and **Blue** would benefit from a balancing session and **Yellow** is on the high end of being balanced.

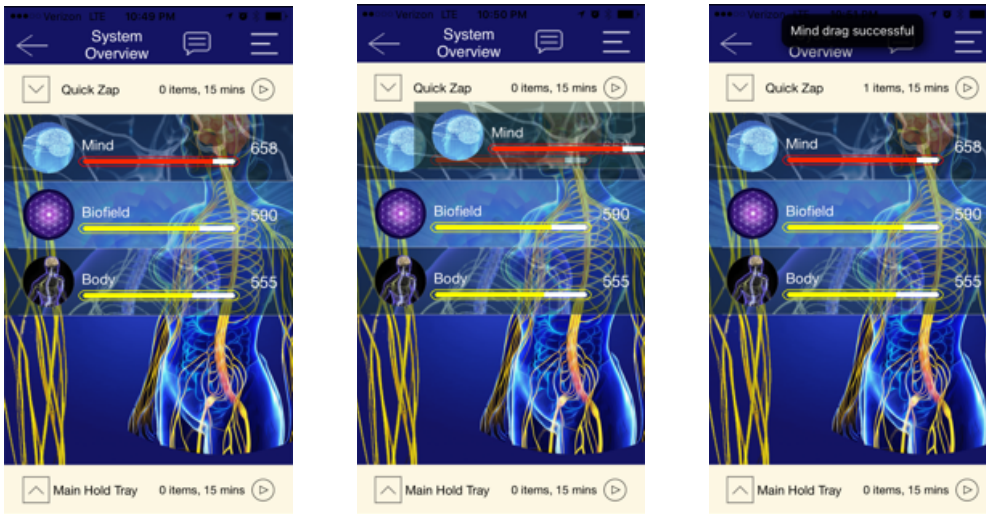

It will show a screen that will invite you to send items into the Quick Zap tray on top or the Main Hold Tray at the bottom (even just a minute per item in Quick Zap tray can help balance)

For quick start purposes you can practice by sending each item to the Quick Zap tray to experience how the APP creates personalized balancing frequencies to help restore your body back into balance.

To PICK up, PRESS the word MIND, BIOFIELD or BODY, and hold for 2 seconds for it to highlight itself and become moveable, when this happens you're able to drag it to one of the trays. Can't seem to get the items, slider bar or anything on a screen page to move? Then your fingertips are too cold (screen pad works off of finger heat). Rub your fingertips together or on some clothing material to warm them up, change fingers or use a stylus. I also found if you're having trouble grabbing and moving it into the tray grab another one and when you go back to the other one again it moves.

Drag the items one at a time (tap & hold each item for approximately 2 secs) into the Quick Zap tray (towards the top of the APP) A message will alert you if you have been successful with the drag feature.

You can open and close the Quick Zap tray by pressing the box “”

You can open and close Main Hold tray by pressing the box “”

Set the Timer by sliding the orange ball  and tap  to Play

## Frequently Asked Questions Answered

### Can I work with children or pets?

Absolutely! You can work their session by holding the child or pet on your lap or you can act as surrogate for them.

Using the Voice Analysis: Holding the intention that you will be speaking for them, you can hold your left hand over your heart and do the recording; then run the Analysis.

### Can I do a “long distance” session?

The answer is “Yes”! You will be accessing the Schumann Wave fields of the Genius which act as a carrier wave. You can get the recording of their voice over the phone or act as a surrogate and use your own voice. Holding the intention that you will be speaking for them, you can hold your left hand over your heart and do the recording; then run the Analysis. Have them e-mail you a current picture.

### How long should a session be?

Small changes have a big effect! There is many different programs and it’s best to follow your intuition on how long to balance for. The key is to balance daily.

## **Do I need to worry about the EMF radiation from my iDevice?**

Most likely not. That only really becomes an issue when you are actually using the phone, receiving a call, or connected to the internet. When using the APP neither is activated. Also the Schumann Wave program helps support you during your use of the APP.

## **Additional System Information**

All complex systems are open to a continual flow of Information. Without Information, energies are aimless and matter crumbles. Each and every organism has its own native language and Information is constantly being encoded and decoded as it passes through the pathways of Nature's network of interdependence.

Archetype Encoding (AE) is a sensitive and sophisticated approach to efficiently delivering Information rich packets of stimulation to a person. AE is built upon the triune foundation of the Experience/Sign/Symbol (ESS) dynamic. Each and every phenomenon generates an Experience and that Experience manifests highly specific Signs. These Signs are an intimate extension of the Experience into Consciousness. The specificity of these Signs in Consciousness allows them to become recognizable at an Archetypal level as Symbols. From that time, any encounter of Consciousness with the Symbol evokes the related Experience even without the original phenomenon.

The melding of Experience/Sign/Symbol occurs as a conditioning by repeated association. This dynamic is also found at the heart of Morphic Resonance in which the Phenomenon becomes a symbolic imprinting of itself. In a sense, the Symbol is brought to life and the ESS collapses into a single twin entity with the phenomenon. Carl Jung famously recognized the super-structure of encoded Symbols and called it the Collective Unconscious. The Collective Unconscious is populated by Archetypes of both higher and lower orders. The principle of the gradual formation of Archetypes runs parallel to Sheldrake's principle of Morphic Resonance.

Archetype Encoding can be thought of as a "translation" of the Experience generated by a phenomenon into a set of aural Symbols. In a relaxed state, the Consciousness of the subject can receive the stimulation and decode the Information at a non-intellectual level. It parallels the way a listener can "get" the message in music without being able to put it into words. It is simply a different kind of knowing.

Yogic Science has probed ESS for thousands of years. From the earliest forms, "Cosmic Sounds or Words" have been recognized as having an innate potency when combined with Consciousness. The Shabda Brahman is the transcendental sound described in the Vedic Scriptures and serves as the basis for many classes of mantra, hymns and prayers. In Tantric concepts, the sound in its primary stage a psychic vibration or vibrating modulation of Consciousness. The experience of Sound is the perception of this vibration in Consciousness. The Sound as Symbol is the entanglement of Meaning, Message, Memory, Motion and Matter.

In Yogic Science, vowel sounds are considered expressions of the Shiva aspect of Reality and consonant sounds that of the Shakti. One could say the vowels are associated with Consciousness/Spirit and the consonants with Manifestation/Matter. In order for a consonant to be expressed, it needs a vowel. In Archetype Encoding, the sound vibration characteristic of every vowel and consonant is coupled methodically with its parallel audial frequency. In this way, each grouping of sounds acts as a creative force that manifests in Consciousness and transfer instantly to the energetic and material aspects of the body. AE is a technical design based on the very act of creation that permeates every moment of Life and Nature.

The positive effects of Archetype Encoding are at their best when the person relaxes their body, opens their mind and heart and breathes naturally. Just listen without effort or expectation. It's like laying back and looking up at the stars....through your ears!

# Glossary

## Algorithm

A formula or set of steps for solving a particular problem. To be an algorithm, a set of rules must be unambiguous and have a clear stopping point. We use algorithms every day. For example, a recipe is an algorithm and also most programs.

## Alignment

The adjustment of an object in relation with other objects, or a static orientation of some object or set of objects in relation to others.

## Archimedean solids

Archimedean solids are convex figures that can be made up of two or more types of regular polygons. All edge lengths of the polygons must be equal, and all of the vertices must be identical, meaning the polygons that meet at each vertex do so in the same way.

*cube*

*truncated  
cube*

*cuboctahedron*

*truncated  
octahedron*

*octahedron*

Unlike prisms, which may have an arrangement of regular polygons at each vertex, Archimedean solids require that at all vertices the angles must be the same. The first five Archimedean solids are created by truncating the original Platonic solids. This allows more than one kind of regular polygon to be used for the faces.

## Aura

An aura is an energy field of subtle, luminous radiation surrounding a person, animal or object. What color is your Aura? More and more studies are showing each day that the aura, or energy field around us, is a fundamental part of our development as individuals. Through it we discover our true inner state, our abilities, our fears and talents. Through the aura we can discover both material and spiritual things. Its color can change depending on our inner current state or a stage of our lives ... the Genius Aura reading will help you discover the current color of your aura, and the whole world of possibilities that come to you through it. Knowing the color of our aura can help us better understand ourselves and seek greater happiness in life.

## **Binaural Beats**

**An auditory brain-stem responses which originate in the superior olivary nucleus of each brain hemisphere. They result from two different auditory impulses or sounds, heard from opposite ears. This binaural beat is consciously heard as the human hearing range is from 20-20,000 Hz.**

**Binaural Beats are achieved by playing two very slightly different frequencies (one in each ear via stereo head/ear phones). The brain then creates the 'imaginary' binaural beat which can be clearly heard. For example if the frequency of 100Hz is heard in the left ear and 110Hz in the right ear, the 'ghost' binaural beat of 10Hz will result. The closer the two frequencies are together, the slower the beat will be and the deeper the level of relaxation that will result.**

**When listening to binaural beats, your brainwaves will gradual 'attune' to the frequency which causes the temporary alterations in consciousness.**

# CHAKRAS

Its name derives from the Sanskrit word for "wheel" or "turning". Chakra is a concept referring to wheel-like vortices which, according to traditional Indian medicine, are believed to exist in the surface of the etheric double of man. The Chakras are said to be "force centers" or whorls of energy permeating, from a point on the physical body, the layers of the subtle bodies in an ever-increasing fan-shaped formation. Rotating vortices of subtle matter, they are considered the focal points for the reception and transmission of energies. Different systems posit a varying number of chakras; the most well-known system in the West is that of seven chakras.

## Energy flow

Energy flows through your body by way of electrical impulses, some of which are nerves or chemical messengers such as hormones or endorphins. Energy is measurable though not always seen.

The machines used in conventional medicine such as EKG, EEG, EMG, MRI, and EKY are used to diagnose disruptions in your body systems. These diagnostic implements seem to be based on the concept of energy and energy fields. The central nervous system, which consists of the brain and spinal cord, sends messages through your nerves directing every part of your being to act appropriately. Energy flows through your body by way of electrical impulses, which may include nerves or chemical messengers such as hormones or endorphins.

There are ten zones, twelve main meridians, and seven main chakras, all of which divide the body into sections. Each of these sections is connected to the structure, function, and well-being of your body. An area or areas may become blocked or congested.

## Energetic signature

When we are born we come into this world vibrating at a certain frequency. It is your "energy signature". Your vibration is a measurement of the speed your energy flows around your body, the speed and direction of your chakras. This relates to how fast you process ideas, emotions and situations... It is something that you cannot measure yet you know it exists.

## EMF (electromagnetic frequencies)

You are like an open "radio system" made up of various electromagnetic frequencies that naturally interact with all natural and man-made external energies. These energies play a large part in your health and well-being. When you interact with the natural and balanced energies such as the Earth's electromagnetic field, you fortify the natural balance within your own energy system, your cells and your DNA. When you are exposed to man-made frequencies, such as microwaves or cell phones, your body absorbs and stores these energy fields. These are chaotic and unnatural electromagnetic fields. It may weaken your immune system and perhaps lead to stress such as illness.

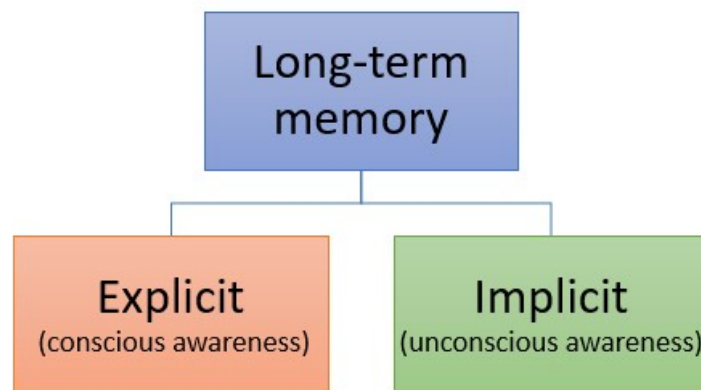

## Epigenetics

This is a newer field of science. Epigenetics literally means “above” the genetics. The study of changes in organisms caused by modification of gene expression rather than alteration of the genetic code itself.

## Explicit

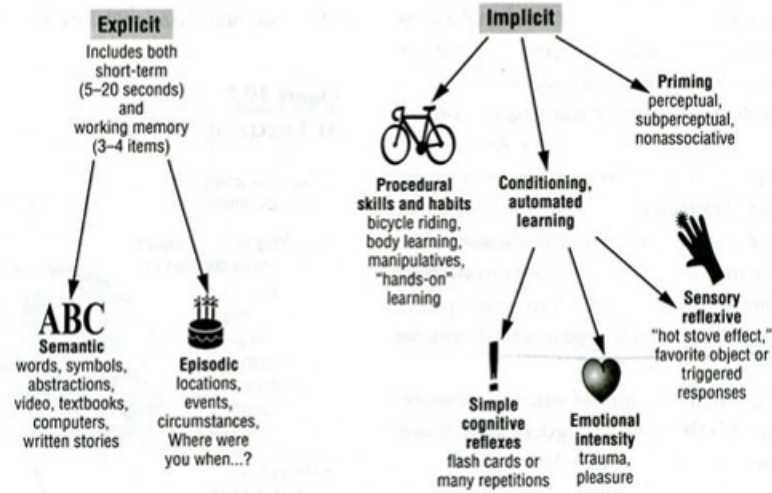

Explicit memory is the conscious, intentional recollection of previous experiences and information. People use explicit memory throughout the day, such as remembering the time of an appointment or recollecting an event from years ago. Explicit memory involves conscious recollection, compared with implicit memory which is an unconscious, non-intentional form of memory. Remembering a specific driving lesson is an example of explicit memory, while improved driving skill as a result of the lesson is an example of implicit memory.

## MEMORY PATHWAYS

All of our learning and life experiences are stored in multiple pathways (for example, music could be in semantic, episodic, and reflexive pathways).

## Fast Fourier Transform algorithms (FFT)

The Fast Fourier Transform is a mathematical method for transforming a function of time into a function of frequency. Sometimes it is described as transforming from the time domain to the frequency domain. It is very useful for analysis of time-dependent phenomena.

## Fast Fourier Transform

- The Fast Fourier Transform (FFT) is a very efficient algorithm for performing a discrete Fourier transform
- FFT principle first used by Gauss in 18??
- FFT algorithm published by Cooley & Tukey in 1965
- In 1969, the 2048 point analysis of a seismic trace took 13 ½ hours. Using the FFT, the same task on the same machine took 2.4 seconds!

**Fast Fourier Transform algorithms generally fall into two classes: decimation in time, and decimation in frequency. The Cooley-Tukey FFT algorithm first rearranges the input elements in bit-reversed order, then builds the output transform (decimation in time). The basic idea is to break up a transform of length into two transforms of length using the identity.**

## Fibonacci Sequence

The sequence, in which each number is the sum of the two preceding numbers, is known as the Fibonacci series.

### Fibonacci Sequence

- The Fibonacci sequence was a sequence of numbers created by Leonardo Pisano Bigollo. He was known as Fibonacci because he was the son of Guglielmo Bonacci. Each number in the Fibonacci sequence is generated by adding the previous two numbers. For example, the fifth Fibonacci number is 5. If you add 5 to its previous number, which is 3, you get 8. 8 is the sixth Fibonacci number. Therefore, this is how the numbers in the Fibonacci sequence is generated.

Leonardo Pisano Bigollo(a.k.a. Fibonacci)

The first six Fibonacci numbers(excluding zero)

## Flower of Life

The Flower of Life is the modern name given to a geometrical figure composed of multiple evenly-spaced, overlapping circles that are arranged so that they form a flower-like pattern with a six-fold symmetry like a hexagon. The center of each circle is on the circumference of six surrounding circles of the same diameter.

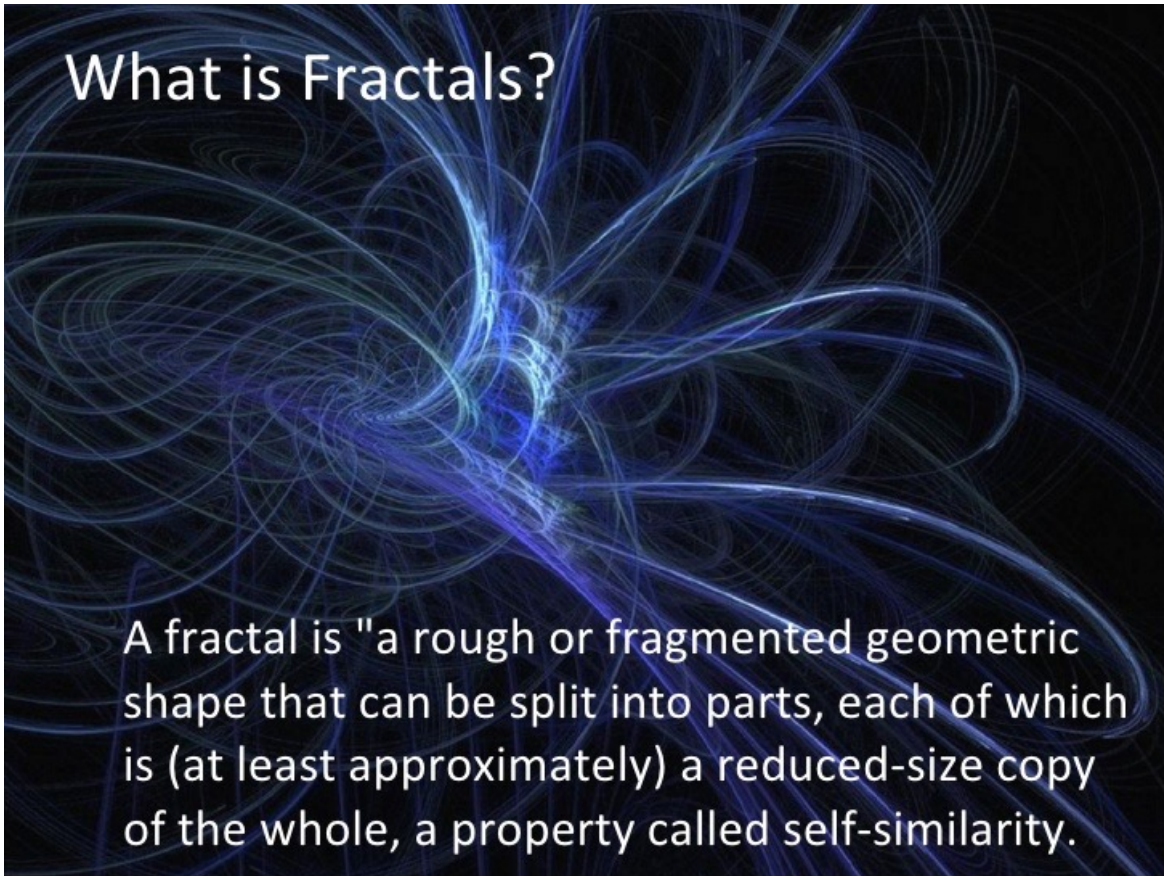

It is considered by some to be a symbol of sacred geometry, said to contain ancient, religious value depicting the fundamental forms of space and time. In this sense, it is a visual expression of the connections life weaves through all sentient beings, believed to contain a type of Akashic Record of basic information of all living things.

There are many spiritual beliefs associated with the Flower of Life; for example, depictions of the five Platonic Solids are found within the symbol of Metatron's Cube, which may be derived from the Flower of Life pattern. These platonic solids are geometrical forms which are said to act as a template from which all life springs.

## Fractal

**A fractal is an object or quantity that displays self-similarity, in a somewhat technical sense, on all scales. The object need not exhibit exactly the same structure at all scales, but the same "type" of structures must appear on all scales.**

What is Fractals?

A fractal is "a rough or fragmented geometric shape that can be split into parts, each of which is (at least approximately) a reduced-size copy of the whole, a property called self-similarity."

# Frequency

**Frequency is the measurable rate of electrical energy flow that is constant between any two points. Everything has frequency.**

**Usually frequency is measured in the hertz unit, named in honor of the 19th-century German physicist Heinrich Rudolf Hertz. The hertz measurement, abbreviated Hz, is the number of waves that pass by per second.**

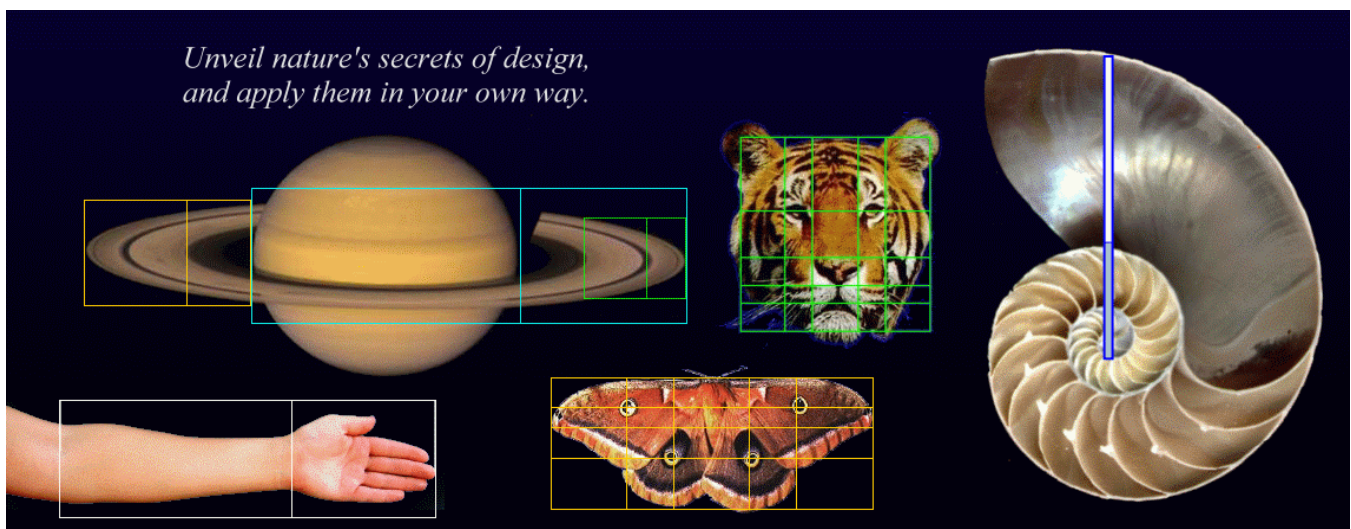

## Golden Ratio/Mean or Divine Proportion

Golden Ratio: 1, 1, 2, 3, 5, 8, 13, 21, 34 etc. Each succeeding number after 1 is equal to the sum of the two preceding numbers. The Ratio formed 1:1.618 is called the golden mean - the ratio of bc to ab is the same as ab to ac. If you divide each smaller window again with the same ratio and joining their corners you end up with a logarithmic spiral.

The Golden Section is a ratio or proportion based on the number phi

Adolf Zeising, whose main interests were mathematics and philosophy, found the golden ratio expressed in the arrangement of branches along the stems of plants and of veins in leaves. He extended his research to the skeletons of animals and the branching's of their veins and nerves, to the proportions of chemical compounds and the geometry of crystals, even to the use of proportion in artistic endeavors.

In these phenomena he saw the golden ratio operating as a universal law. Zeising wrote in 1854:

*The Golden Ratio is a universal law in which is contained the ground-principle of all formative striving for beauty and completeness in the realms of both nature and art, and which permeates, as a paramount spiritual ideal, all structures, forms and proportions, whether cosmic or individual, organic or inorganic, acoustic or optical; which finds its fullest realization, however, in the human form.*

## **Dynamic Hologram Representation – Harmonic Algorithms**

**Suggestion: During balancing, a dynamic moving hologram will be displayed which possess tremendous positive properties. Have your client or you yourself focus on these ever changing holograms to stimulate and receive visual as well as auditory balancing information.**

**The laws of nature are but the mathematical thoughts of God - Euclid  
It is our theory that these harmonic algorithms are based on sacred geometry, mathematical principles and formulas to help us analyze the data.**

## **Hololinguistics**

**Words are processed through as a series of algorithms to obtain their energetic signature. Subtle, but powerful influence of words; power of the written word.**

## Implicit

Implicit memory is a type of memory in which previous experiences aid in the performance of a task without conscious awareness of these previous experiences. Implicit memory also leads to the illusion-of-truth effect, which suggests that subjects are more likely to rate as true those statements that they have already heard, regardless of their veracity. In daily life, people rely on implicit memory every day in the form of procedural memory, the type of memory that allows people to remember how to tie their shoes or ride a bicycle without consciously thinking about these activities. Research into implicit memory indicates that it operates through a different mental process from explicit memory.

**Implicit Memory**  
*Experiential or functional form of memory  
that cannot be consciously recalled*

## Meridians

Meridians are the pathways of qi (chi) and blood flow through the body. Qi flows continuously from one meridian to another. Any break in the flow is an indication of imbalance. If a person's vitality or energy is recognizably diminished it is an indication that the body's organs or tissues are functioning poorly, therefore the chi flow is inadequate.

These channels exist (not visible to the eye) within the subtle body and together, they form the matrix within which the physical body functions. {The subtle body is an energy field which has a structure, which influences and gives life to our physical body.}

## **Metatron's cube**

The simplest means of constructing Metatron's Cube is to begin with a cube flattened along a diagonal that passes through its center, such that it becomes a 2D figure, equivalent to a regular hexagon divided via its own diagonals into six equilateral triangles. The vertices of this 2D figure are then connected with additional lines. Several steps later, the full Metatron's Cube figure is formed.

**Metatron (from Greek  
Meta+Tron meaning Beyond+Matrix.).**

## **Nogier Frequencies**

According to the late French neurologist, Dr. Paul Nogier, unbalance in the body can result when cells, molecules or particles of matter are out of their normal resonance or vibratory pattern. By repeatedly exposing damaged tissue to the normal resonance frequencies associated with that tissue, balancing can often occur, sometimes quite rapidly. According to Dr. Nogier, sickness results when cells, molecules or particles of matter are out of their normal resonance or vibratory pattern. By repeatedly exposing damaged tissue to the normal resonance frequencies associated with that tissue, healing often occurs, sometimes quite rapidly.

1. (Frequency F, 73 Hz) For use when cellular activity is hypoactive, such as chronic recurring problems, nonunion fractures and chronic splints and for stimulation of osteoid. It is also helpful in activating humoral and endocrine functions. Field work has shown setting 1 helpful in stimulating (tonifying) acupuncture and trigger points and increasing circulation in areas being treated, such as wounds when past the acute stage.
2. (Frequency G, 147 Hz) For areas of yellow scar tissue that are generally formed internally on tendons, ligaments and sub-acute (lingering but not chronic) conditions. Field use has shown setting 2 to be helpful in reducing inflammation associated with injuries and infections. This is often called the universal frequency because most problems involve inflammation.
3. (Frequency A, 294 Hz.) For tissue of ectodermal origin, such as body openings, skin and nerve. Field applications include wounds, eye injuries and after surgery. Setting 3 tends to tone tissue while minimizing the chance of hemorrhaging fresh wounds or recent surgical sites. It is

also good for the treatment of acupuncture and trigger points, corneal ulcers and ulcerated mucous membranes. This is called the universal frequency in acupuncture.

4. (Frequency B, 587 Hz.) This frequency appears to be most effective for neuropathy, but also for circulatory and lymphatic stimulation and treatment of tissue of endodermal origin, such as GI tract, liver and pancreas. In field applications, setting 4 has been used in conjunction with 5 and 2 for tendon, ligament, joint and other injuries where reaching secondary levels of tissue is needed.

5. (Frequency C, 1174 Hz.) For tissue of mesodermal origin, such as bone, joints, ligament, viscera and tendon. Field experience has shown setting 5 to be especially good for tendon and ligament injuries when used with 4 and 2. It also helps in relaxing large muscle groups.

6. (Frequency D, 2349 Hz.) For chronic conditions not responsive to setting 3 or 5. Field experience shows setting 6 to be a good supplement to 3 when healing processes appear to reach a plateau.

7. (Frequency E, 4698 Hz.) For pain control, primarily when C nerve fibers are transmitting to dorsal root ganglia and when involvement of neurotransmitters is of physiological importance. Field experience shows 7 to help suppress pain and to sedate acupuncture and trigger points and aid in diminishing excess calcification associated with chips, spurs and arthritic conditions.

## Platonic solids

In geometry, a Platonic solid is a convex polyhedron that is regular, in the sense of a regular polygon. Specifically, the faces of a Platonic solid are congruent regular polygons, with the same number of faces meeting at each vertex, thus, all its edges are congruent, as are its vertices and angles.

The name of each figure is derived from its number of faces: respectively 4, 6, 8, 12, and 20.

The five regular solids discovered by the Ancient Greek mathematicians are:

The <b>Tetrahedron</b> :	4 vertices	6 edges	4 faces	each with 3 sides
The <b>Cube</b> :	8 vertices	12 edges	6 faces	each with 4 sides
The <b>Octahedron</b> :	6 vertices	12 edges	8 faces	each with 3 sides
The <b>Dodecahedron</b> :	20 vertices	30 edges	12 faces	each with 5 sides
The <b>Icosahedron</b> :	12 vertices	30 edges	20 faces	each with 3 sides

The solids are regular because the same number of sides meet at the same angles at each vertex and identical polygons meet at the same angles at each edge. These five are the only possible regular polyhedra.

## Recursive Geometrics

The process of choosing a starting term and repeatedly applying the same process to each term to arrive at the following term. Recursion requires that you know the value of the term immediately before the term you are trying to find.

A recursive formula always has two parts:

1. The starting value for  $a_1$ .
2. The recursion equation for  $a_n$  as a function of  $a_{n-1}$  (the term before it.)

RECURSIVE FORMULAS

$$\begin{cases} a(1) = 3 \\ a(n) = a(n-1) + 2 \end{cases}$$

## Sacred geometry

**Sacred geometry involves sacred universal patterns used in the design of everything in our reality, most often seen in sacred architecture and sacred art. The basic belief is that geometry and mathematical ratios, harmonics and proportion are also found in music, light, and cosmology. This value system is seen as widespread even in prehistory, a cultural universal of the human condition.**

**Within the Sacred Geometry screen, each and every item represents one of the cornerstones of sacred geometry. Each image contains certain geometric algorithms which may have a beneficial effect to the person. However, how do you know which one? You SCAN the body and look to see which ones the person has responded to. In other words, the higher the number the more the body is desiring this item.**

## Solfeggio tones

**These six original sound frequencies were apparently used in Ancient Gregorian Chants, such as the great hymn to St. John the Baptist, along with others that church authorities say were lost centuries ago. The chants and their special tones were believed to impart tremendous spiritual blessings when sung in harmony during religious masses. These powerful frequencies were rediscovered by Dr. Joseph Puleo as described in the book “Healing Codes for the Biological Apocalypse” by Dr. Leonard Horowitz.**

### Soliton

**Wikipedia:** In mathematics and physics, a soliton is a self-reinforcing solitary wave (a wave packet or pulse) that maintains its shape while it travels at constant speed. Solitons are caused by a cancellation of non-linear and dispersive effects in the medium.

**Alex Kasman stated:** To put it in terms that may be easier to understand, solitons are waves that act like particles. It is interesting that such things exist at all. People once doubted their existence. However, the mathematical theory of solitons is now a well-developed "science".

### Schumann resonance

Now with each and every balancing session we have super imposed the Schumann Resonance Frequency. Another one of the great benefits of the Stacked Wave Delivery System.

The benefits are that this will improve long distance sessions and also help protect you and your client from harmful EMF's.

In 1952 Winfried Otto Schumann, at that time Director of the Electrophysical Institute at the Technical University of Munich, published his first paper about electromagnetic waves in the waveguide which is formed by the earth's surface and the ionosphere.

**It is the Earth's background base frequency, or "heartbeat of Mother Earth". Just as a tuning fork has natural frequencies for sound, the planet Earth has natural frequencies, called Schumann resonances, for electromagnetic radiation.**

**In other words, the natural frequency of the Earth at the boundary of the inner core is about 40 cycles/sec, which is at the upper end of the range of frequencies measured for the Schumann resonances: 7.8, 14, 20, 26, 33, 39 and 45 Hertz. The Human Brain also has natural frequencies for electromagnetic radiation. The Beta and Alpha waves (8 to 30 Hz) seem to correspond, be "in tune" to the Schumann resonances.**

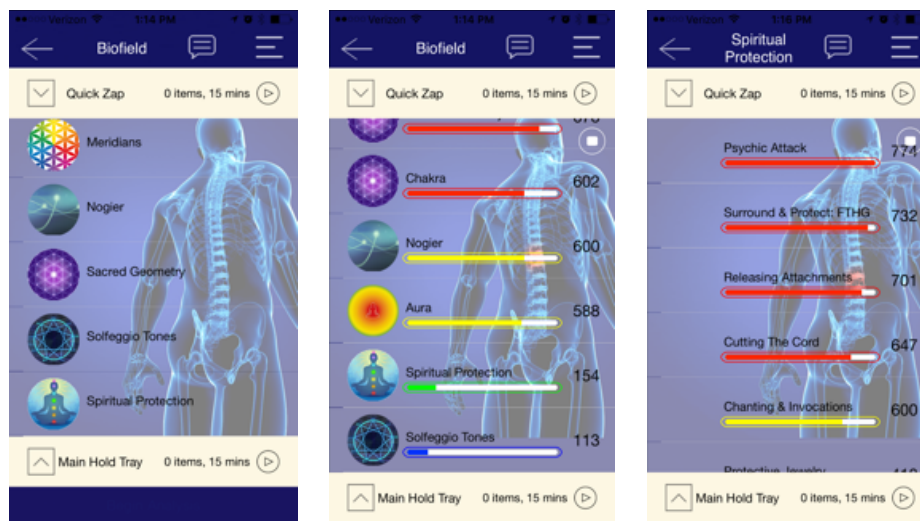

**Time is actually speeding up (or collapsing). For thousands of years the Resonance or pulse (heartbeat) of Earth has been 7.83 cycles per second, The military have used this as a very reliable reference. However, since 1980 this resonance has been slowly rising. Some scientists believe that it is rising faster than we can measure seeing as it is constantly rising while measuring.**

### **Shaping function**

**During balancing, a dynamic moving hologram will be displayed which possess tremendous balancing properties. Have your client or yourself focus on these ever changing holograms to stimulate the visual balancing capabilities.**

## Spiritual Protection Panels

For items with a number near zero there is no need for correction/balancing? For large numbers in psychic attack for example, does this mean that there has been psychic attack done on the client or is it measuring fear of psychic attack? And is this the same for dark forces and entities? When an analysis is complete, the Genius is looking for the probability or a reaction for the respective tested items. It is then up to the technician to apply this information to the clinical context of the client and discuss the results with the client. Relate the symptoms, emotions and reactions to the results displayed and ask yourself why the client has reacted to these individual items. In designing the APP, we could not create a "magic bullet effect" that a high number is the considered absolute and correct number. The APP will show the disturbance or probability and then you need to apply your own experience and clinical context. As an option it would be advisable to go to the AURA panel and review the colors there. If there are dark colors around the AURA, then this could imply psychic attack. Equally your client may seem anxious and concerned about psychic attack. In any case as it is a high number, you would want to balance the item regardless as if the client is under psychic attack or has a fear of psychic attack you would want to balance and address that specific issue.
